DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 6-11 and 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by US 20040227870A1 (“870”).

Per claim 1, 870 teaches a liquid crystal display module, comprising: a first bezel module, having: a lower bezel [124]; a diffusion plate set up over the lower bezel [150a]; an optical film plate set up over the diffusion plate [150b]; a liquid crystal panel set up over the optical film plate [170]; and an upper bezel above the lower bezel such that the lower bezel and the upper bezel together fix the diffusion plate, the optical film plate and the liquid crystal panel [180]; a second bezel module, having: a bottom bezel [112]; a reflecting plate set up on the bottom surface of the bottom bezel [120]; and a light source positioned within the bottom bezel above the reflecting plate [130], wherein the first bezel module is assembled with the second bezel module in a detachable way [see screws 192].

Per claim 2, 870 teaches the liquid crystal display module of claim 1, wherein the first bezel module is fastened to the second bezel module through some locking elements [the screws 192].

Per claim 3, 870 teaches the liquid crystal display module of claim 1, wherein the first bezel module has an interior space for accommodating the second bezel module [see figure 4].

Per claim 6, 870 the liquid crystal display module of claim 1, wherein the optical film plate comprises light-enhance plate or prism plate [the second light diffusion plate 150b is a light enhancement plate].

Art Unit: 2871

Per claim 7, 870 teaches the liquid crystal display module of claim 1, wherein the light source comprises a cold cathode fluorescent lamp (CCFL) light source [see specification].

Per claim 8, 870 teaches the liquid crystal display module of claim 1, wherein the module furthermore comprises a light source holder set up within the bottom bezel for holding the light source element [see 114a].

Per claim 9-11 and 14-16 870 teaches a liquid crystal display module, comprising: a first bezel module, having: a lower bezel [124]; a diffusion plate set up over the lower bezel [150a]; an optical film plate set up over the diffusion plate [150b]; a liquid crystal panel set up over the optical film plate [170]; and an upper bezel above the lower bezel such that the lower bezel and the upper bezel together fix the diffusion plate, the optical film plate and the liquid crystal panel [180]; a second bezel module, having: a bottom bezel; wherein the bottom bezel is fabricated using a light-reflecting material [122-124]; and a light source positioned within the bottom bezel, wherein the first bezel module is assembled with the second bezel module in a detachable way [130].

Allowable Subject Matter

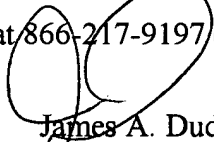

Claims 4-5 and 12-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
